Particle Analysis Course Agenda

Introduction
The one-day Particle course will be offered often after a TEAM™ training course but also as a separate course. The course gives an introduction to the strategy of Particle Analysis with further detail using customer samples.

1 Day Particle Analysis Course Agenda

Day 1
Basics and examples to show the possibilities and applications
Creating libraries
Setting up multifield measurements
Analysis of the collected data
Recalculation and creating reports of the data

*Please note the topics of the course may vary depending on the interest of the attendees. Attendees are welcome to bring their own samples.
